PROFESSIONAL SUMMARY

Software Engineer with 8+ years of experience building scalable web applications, WordPress products, and browser extensions. WordPress Core Contributor, major contributor to **Directorist** and **Templatiq**, and contributor to **FormGent** and **HelpGent**. Strong background in JavaScript, React.js, Next.js, TypeScript, PHP, and the WordPress ecosystem, with a track record of shipping reliable production products used by real businesses and communities.

WORK EXPERIENCE

Software Engineer

Feb 2022 – Present

SovWare

Building product features, integrations, and frontend systems across multiple WordPress product lines used by thousands of users.

- Major contributor to **Directorist** — AI-powered business directory product with advanced search, monetization, and ecosystem add-ons
- Major contributor to **Templatiq** — template library product supporting Elementor, Bricks, and Gutenberg workflows
- Contributor to **FormGent** — AI-powered conversational form builder using React.js and Gutenberg
- Contributor to **HelpGent** — video messaging and screen-recording communication product for WordPress
- Built and enhanced lots of Directorist extensions including Booking, Business Hours, Maps, Reviews, Search, Social Login, FAQs, and more

React.js Next.js TypeScript Vue.js WordPress Gutenberg Elementor

Web Developer

Sep 2017 – Jan 2022

RSTheme

Developed premium WordPress themes and modern frontend templates for ThemeForest and commercial web products.

- Built lots of premium WordPress themes with Elementor integration (Braintech, Educavo, Reobiz, Dabble, and more)
- Created React.js and Next.js templates across business, education, agency, and technology niches
- Developed **RS Elements** — Elementor Addon
- Designed responsive, cross-browser layouts optimized for performance and accessibility

WordPress Elementor React.js Next.js ThemeForest
